

Lessons from Lesotho, Thailand and Honduras

# Brand campaigns & worker organizing

A new publication from the Maquila Solidarity Network, *Brand Campaigns & Worker Organizing* profiles three successful international campaigns that helped defend workers' right to organize.

Available in English and Spanish, the 82-page booklet is an invaluable educational resource for anti-sweatshop activists, labour and human rights advocates, trade unionists, researchers, educators and anyone concerned about the conditions under which their clothes are made.
